

# DOCTOR PLUS<sup>®</sup>

## **Innovation in the Disease Management**

*Improving Patient's outcomes through remote Patient monitoring*

# Improving Patient's outcomes through remote Patient monitoring

**Doctor Plus®** combines clinically-validated Patient monitoring protocols, Digital Health solutions and qualified services (from consulting to nursing center) to redefine a new Patient's pathway that gives More Life to Life.

With **Doctor Plus®**, the Patient's disease management program is redesigned in each and every phase, from clinical to assistential pathways. It enables Clinical Centers and Physicians to provide personalized care pathways that improves clinical, economic and organizational outcomes.

**Improved quality of life**

**Improved economic outcomes (e.g. ER accesses)**

**Improved exams and visits scheduling**

**Improved adherence and appropriateness**

# Doctor Plus<sup>®</sup> is a modular solutions, combining valuable services to better respond to specific customer needs

## Core Services

1

The Vree Health proprietary cloud-based clinical platform is a **CE class IIa medical device marked software**, supporting either administrative and clinical processes and activities, integrating data from different sources to allow coordinated care by Health Care Professionals.

2

Easy-to-use **Patient Monitoring Kits** can be provided to Patients to acquire and monitor clinical parameters (e.g. glucose, blood pressure, etc.). Data are automatically collected by a **bi-directional Hub** which also delivers surveys, reminders, educational contents and more. Data are transmitted over broadband, mobile or analog line.

3

**Nursing Centre**, with relevant experience in remote Patient management and following specific **Patient monitoring protocols developed by Vree Health**.

# Doctor Plus<sup>®</sup> is a modular solutions, combining valuable services to better respond to specific customer needs

# Easy to use. Quick to implement. Validated by clinical and real life evidences

A monitoring protocol defines the set of data to be collected by medical devices and/or Service Center

- ✓ Monitoring of clinical parameters collected at home or in mobility;
- ✓ supporting patient self-empowerment for plan adherence and persistence to therapies
- ✓ additional data collection (e.g. surveys), providing reminders (therapy, visits and exams, etc.)
- ✓ Data can be consulted anytime, anywhere.

The Service Center provides active support to either patient, caregiver and health care professionals

# A broad value experience.
